

INTRODUCTION TO CURRICULUM PLANNING

This workshop, delivered by Alison Sumpter on behalf of AELP, will enable you to develop a broader understanding of the main differences in planning a curriculum offer for the apprenticeship standards. It will also help you to develop strategies to ensure that your organisation is considering and applying innovative approaches and options for collaboration and use of technology.

The workshop is aimed at providers who are new to apprenticeships, those who are not yet ready to deliver standards and those who are ready to deliver standards but have no starts yet. It will be ideal for members of your organisation responsible for taking forward curriculum planning and design for apprenticeships.

Course Content:

- Understand the differences between frameworks and standards.
- Understand assessment plans, end point assessment and liaison strategies with Apprenticeship Assessment Organisations.
- How to involve employers in the design of the apprenticeship.
- Understand delivery model options including blended learning.
- Monitoring/tracking apprentice progress.
